Bleacher and  
POP- Up units

*“ Saving space  
Easy to open, light in  
use “*

## 2-Row Bleacher units

**RAITA Bleacher units are made of reliable and robust modules. All load-bearing structures are made of steel.**

**Structural design complies with applicable standards and regulations**

**All steel components are treated with polyester powder coating, which is highly resistant to wear and corrosion, standard colour is white but can be customised to meet the client's needs. The deck is strong birch plywood with lacquer treatment. Can be stained according to desired colour**

**The delivery includes user training during the installation work. The delivery includes instructions for use and maintenance (in English) in three printouts and in electronic format.**

## 3 or 4-Row Bleacher units

Due to gas pistons RAITA- Bleacher units are very light to open and close

Bleacher units are manually operated included locking mechanism

Removable side railings. Storage a wall-mounted rack or a storage cart (optionally).

All steel components are treated with polyester powder coating, which is highly resistant to wear and corrosion. Colour can be customised to meet the client's needs (option). Standard colour is white

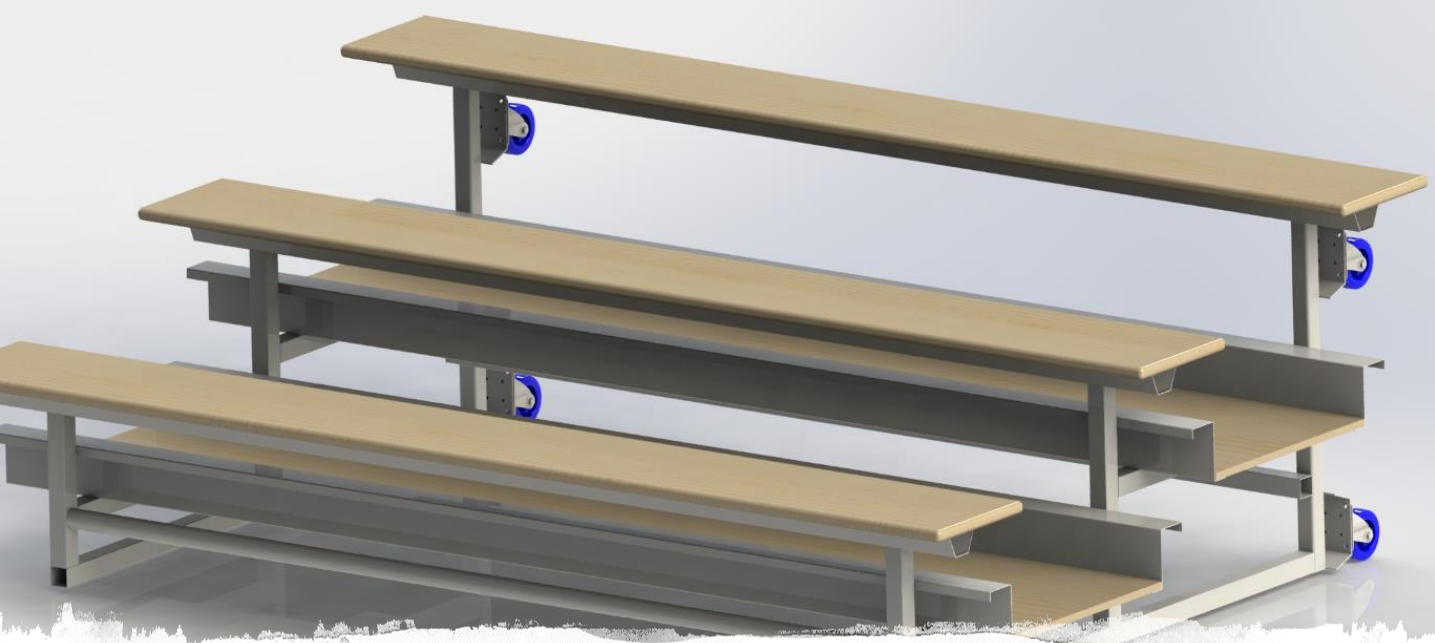

Thanks to their durability, reliability and very little need for maintenance, RAITA Bleacher units have low maintenance costs. Because the seating systems are manufactured in Finland, all critical spare parts are readily available from the factory.
